SUMMARY

A fresh graduate of Bachelor of Software Engineering from UPM, I am a highly motivated person that has keen interest in software development. Adept at problem-solving, collaborating, and communicating effectively to drive successful project outcomes. Have experienced as a Full Stack in my current job training that will end on this January 2024 . Looking for job opportunity to contribute my skill while also expand the experience that I will be gained as a Junior Developer

Work Experience

First Pavillion Global

Software Engineer

Oct.2023 - Present

Worked well independently and on a team to solve problems.

Primarily use Go , ReactJS and Git as version control

Did several project from youtube for both back end and front end as learning before assigned into project

Involved in 2 project which is

FPG Capital as Back End Developer
